

# Liquid Rubber Industries

## Liquid Rubber

*Innovators in environmentally safe protective coatings*

### A SEAMLESS, SELF-HEALING MEMBRANE FOR METAL PROTECTION

*The excellent adhesion and elastomeric properties of Veazar™ prevents the membrane from tearing or separating from even rusted metals. Excellent for pipe protection.*

*Applied using specially designed spray equipment, Veazar™ protects metal shipping containers from the ravishes of salt water spray.*

Veazar™ applied over metal to waterproof and provide corrosion protection.

*Spray applied Veazar™ seals complex profiles, producing a seamless waterproof membrane, protecting metal from water corrosion.*

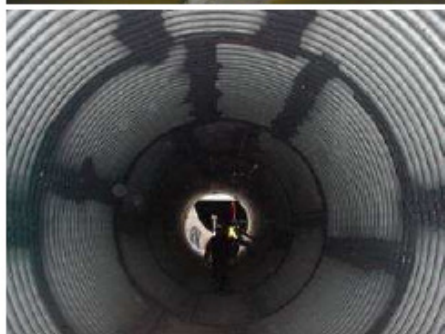

The equipment needed by the contractor to apply Veazar™ has been specially modified by Liquid Rubber Industries to meet the requirements of applying polymer and elastomeric asphalt emulsion. This equipment is compact and easy to transport and set up at the job site.

*Veazar™ is applied as a protective liner in steel tanks, culvers and wastewater systems. Veazar™ is specially formulated to withstand chemical corrosion from a wide range of materials.*

Veazar™ should only be applied using Liquid Rubber approved spray equipment.
